

## Team XX Your Project Persona User Story Task Flow

- Please duplicate this shared file: **File → Make a copy**
- Please name the file: **teamX\_persona\_wireflow.pdf** (One person in the team submits PDF)
- To properly create clickable hyperlinks: **Select Text → Insert → Link (Control-K) → Paste Link → Apply**

NOTE: In this course, all your applications will have a “user account setup and sign-in” feature. Since we will use a firebase authentication, **you DO NOT need to design the login flow**. Instead, focus your energy on designing features specific to your application idea.

### 1. Project pitch in a nutshell

One-sentence Pitch:

Our team, BBY\_06, building an application called PlantPal—your ultimate pal in planting—offering personalized care guides and reminders to help you nurture your plants with ease.

### 2. Teamwork in a nutshell

- Describe one aspect of teamwork that's working well for your team.  
Everyone is collaborating well and communicating outside of class.
- Describe one aspect of teamwork that could be improved for your team.  
Stop procrastinate and try to finish our lab early as possible.
- What's one statement to add/update for your Working Agreement? (Update your Figjam.)  
We can communicate through voice call after classes to work on our project.

### 3. Persona

Develop your primary persona on FigJam, using the 4-quadrant template example. Focus on the behavior, motivation, goals, and needs of the target group. You can get free stock photos of people from sources like [www.unsplash.com](http://www.unsplash.com) . Aim for 4-5 relevant points for each quadrant (description, behavior, and needs).

Paste a screen capture of your persona(s) here.

Persona	
<b>YOUR PROJECT (PlantPal)</b>	
<p>Name and Picture / Quote</p> <p>John William Smith "You miss 100% of the shots you don't take"</p> 	<p>Description</p> <ul style="list-style-type: none"> <li>• 32 years old</li> <li>• Lives in Orlando, Florida</li> <li>• Married with no kids</li> <li>• He's a Realtor</li> </ul>
<p>Behaviors</p> <ul style="list-style-type: none"> <li>• They have a garden that they maintain everyday</li> <li>• Loves planting</li> <li>• Take photos of his plants</li> </ul>	<p>Needs and goals</p> <ul style="list-style-type: none"> <li>• A easy way to search for plants information</li> <li>• Would like to read and post reviews</li> <li>• Need a reminder on his watering since he owns a lot of different types of plants</li> </ul>

#### 4. Red Routes

List all red routes for your product and place them on the red route map. Aim for 5-6 items.

Paste a screen capture of your map here.

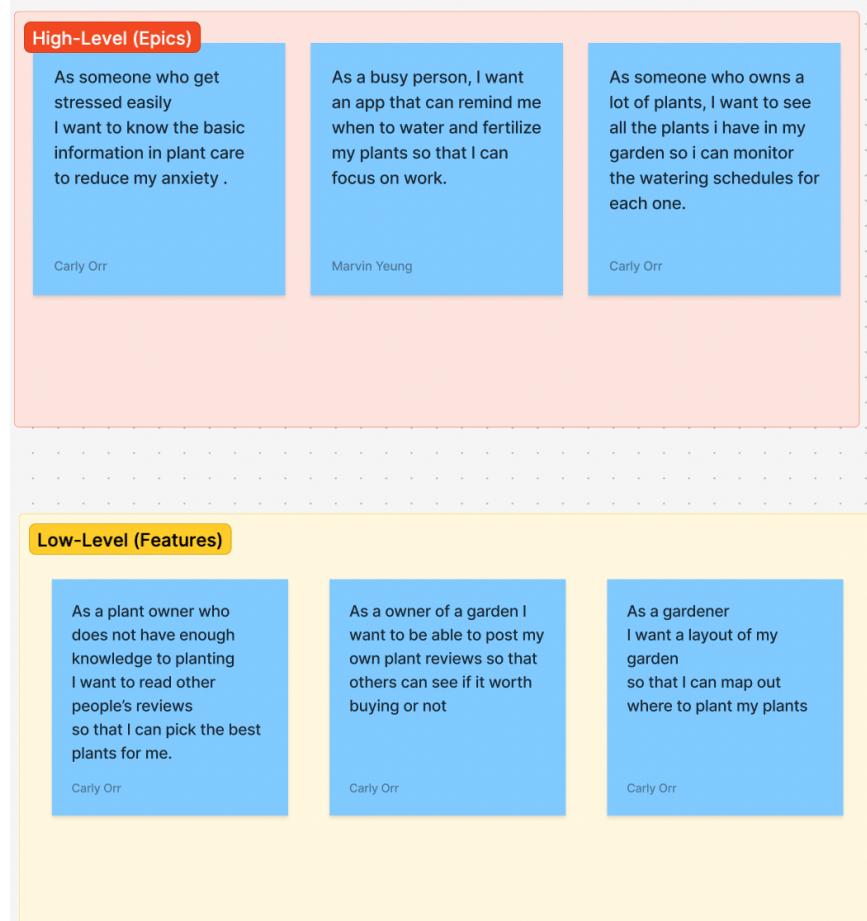

## 5. User Stories

Based on priority, pick 3-5 of the most important red routes, and provide user story statements for them. Aim for 5 or more stories. Some generic user-story examples can be found here: "User Story Examples" PDF posted in LearningHub->Resources. Use a variety of nouns/verbs/adjectives/adverbs to write realistic narratives. Label or organize by priority.

Red Route	User Story
View Plant Information	As someone who get stressed easily I want to know the basic information in plant care to reduce my anxiety.
Adding plant to your garden	As someone who owns a lot of plants, I want to see all the plants i have in my garden so i can monitor the watering schedules for each one.
Need a reminder on when to water their plants	As a busy person, I want an app that can remind me when to water and fertilize my plants so that I can focus on work.

OR paste sufficient images from your FigJam showing these user stories

*"Paste sufficient images to show your User Story development work here"*

## 6. Task Flow (or simple flowchart)

Each User Story is realized by one core task flow, and possibly some supporting task flows. A task flow is a series of sequential steps needed to accomplish a task or goal.

Each team member should pick one user story and corresponding (core) task flow to develop as follows. Define the task, then sketch the flow. Just boxes with text, and arrows. Or, an enumerated list of linear steps.

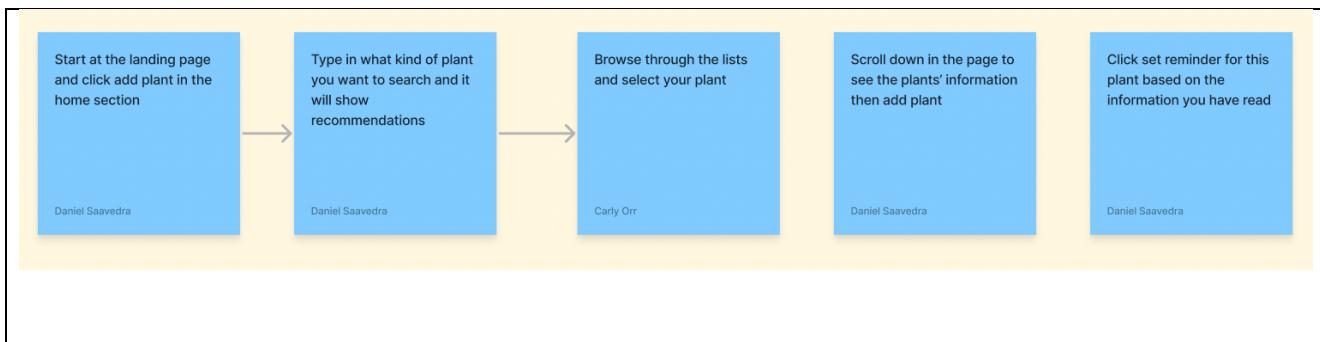

Task Flow #1 Created by team member: Daniel Saavedra

Red route: "View Plant Information"

User story: "As someone who get stressed easily I want to know the basic information in plant care to reduce my anxiety ."

Task title: "How to find plant information"

Paste screen capture of flow here.

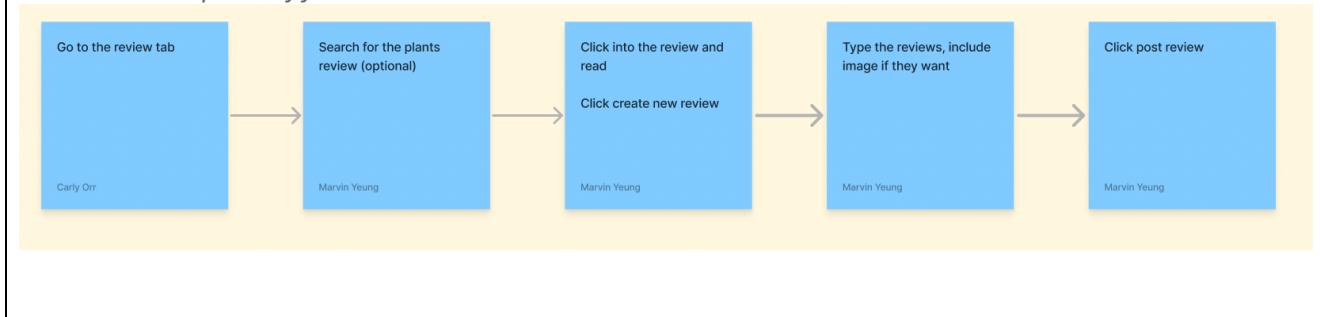

### Task Flow #2 Created by team member: Marvin Yeung

**Red route:** "Post reviews about different plants and read others reviews on plants"

**User story:** "As an owner of a garden I want to be able to post my own plant reviews so that others can see if it worth buying or not"

**Task title:** "Read and Post Reviews"

Paste screen capture of flow here.

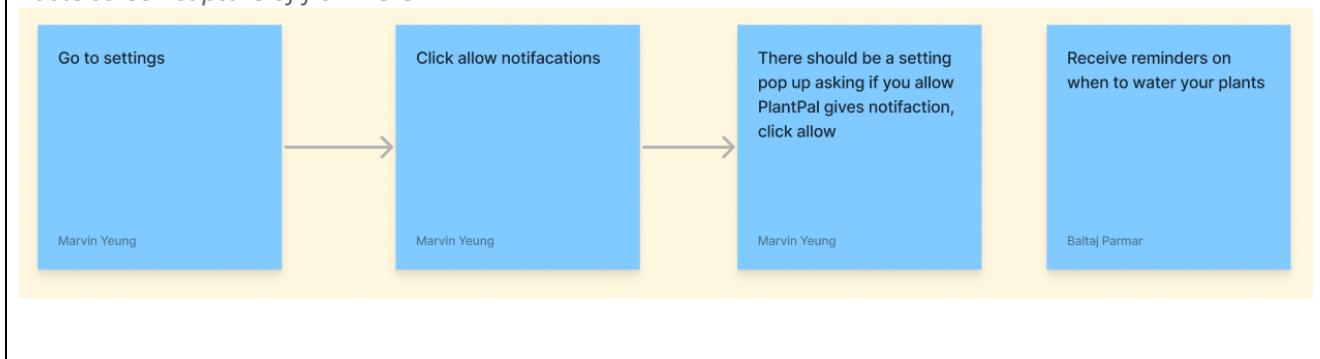

### Task Flow #3 Created by team member: Baltaj Parmar

**Red route:** "Need a reminder on when to water their plants"

**User story:** "As a busy person, I want an app that can remind me when to water and fertilize my plants so that I can focus on work."

**Task title:** "Allowing Watering Reminders"

Paste screen capture of flow here.

## 7. Simple wireflow (for mobile)

For each task flow above, sketch out the wireframes for them. We call these “wireflows”. Keep it simple, low fidelity, with pen and paper! Focus only on **key interactive elements**.

**Include lines and arrows between screens to show the interaction between elements.**

**Use a tool like Microsoft Lens on your phone to scan your pen and paper sketches.**

Wireflow #1

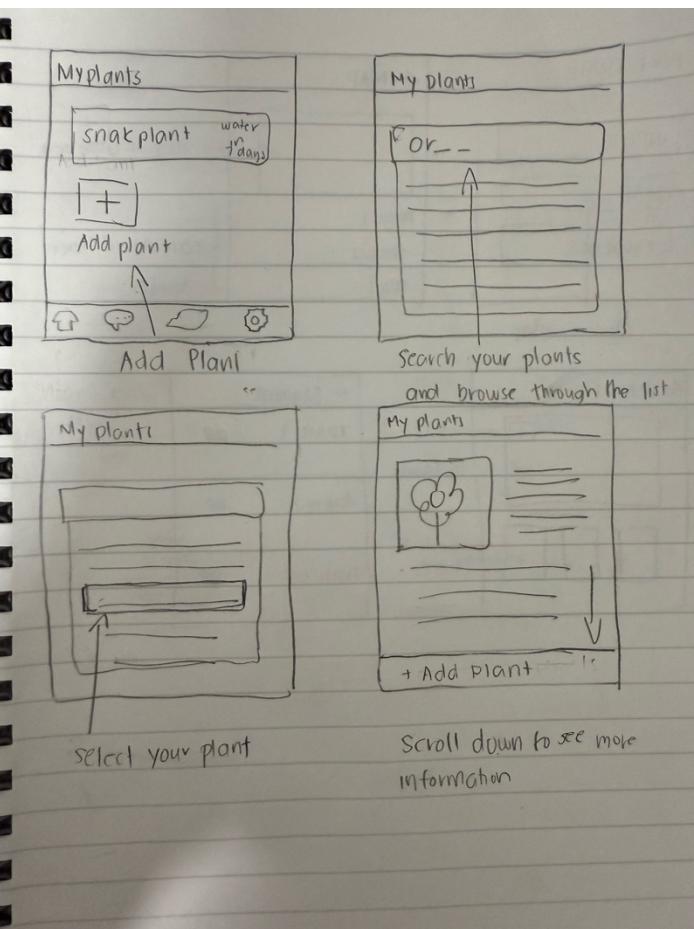

Created by team member: Daniel Saavedra

Red route: “View Plant Information”

User story: “As someone who get stressed easily I want to know the basic information in plant care to reduce my anxiety.”

Task title: “How to find plant information”

Paste the image of wireflow here.

## Wireflow #2

Created by team member: Marvin Yeung

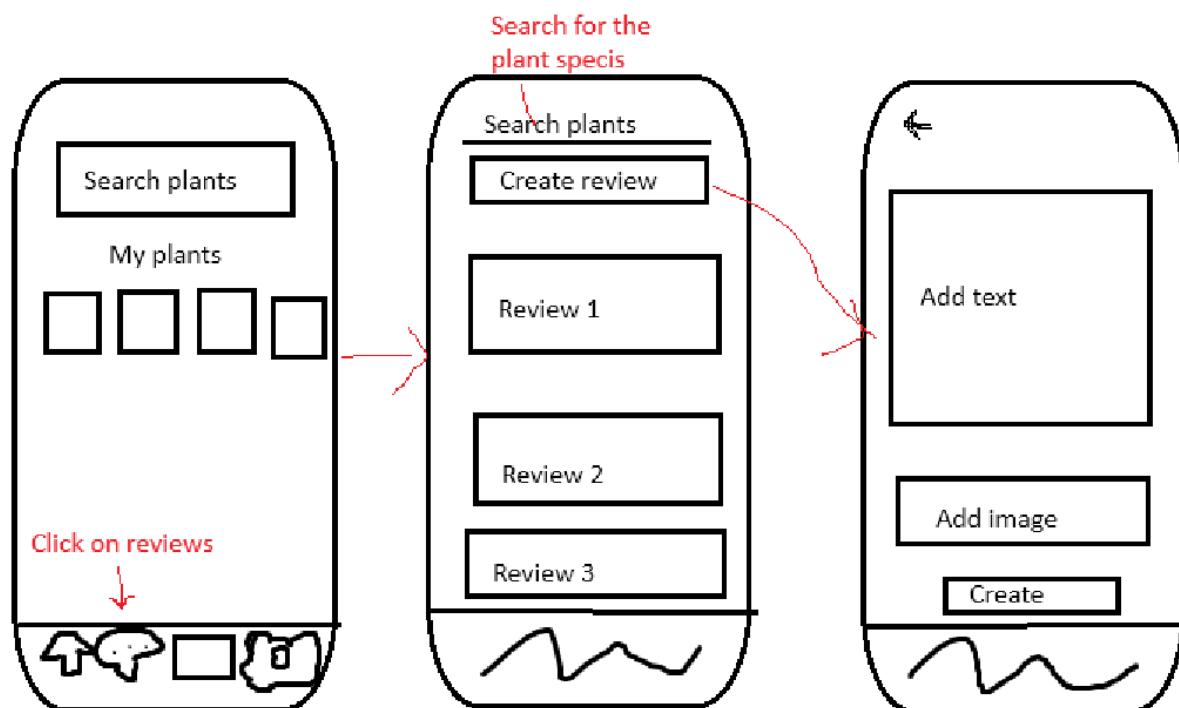

Red route: "Post reviews about different plants and read others reviews on plants"

User story: "As an owner of a garden I want to be able to post my own plant reviews so that others can see if it worth buying or not"

Task title: "Read and Post Reviews"

Paste the image of wireflow here.

### How to read and post reviews

## Wireflow #3

Created by team member: Baltaj Parmar

Red route: "Need a reminder on when to water their plants"

User story: "As a busy person, I want an app that can remind me when to water and fertilize my plants so that I can focus on work."

Task title: "Allowing Watering Reminders"

Paste the image of wireflow here.
